

Natural Products INSIDER leads CPG brands from ideation through manufacturing, supporting the development of innovative, healthy and compliant products in the dietary supplement, food, beverage and sports nutrition industries. INSIDER helps companies understand the supply, formulation, science and regulatory considerations affecting the healthy and better-for-you CPG market. As an official content provider for SupplySide, INSIDER connects ingredient buyers and suppliers with executives across the health and nutrition marketplace.

SupplySide West is the world's leading ingredient and solutions tradeshow where science & strategy intersect. Every year, SupplySide West brings over 16,000 ingredient buyers and suppliers together from the dietary supplement, beverage, functional food, personal care and sports nutrition industries. SupplySide West is all about the exploration, discovery, innovation and marketing strategy around the development of finished products that drive the global business economy.

SupplySide East is where buyers and sellers connect from the supplement, food & beverage, beauty and sports nutrition industries. At its home in Secaucus, New Jersey this event is attended by more than 3,500 industry decision-makers.

Digital Magazines

Natural Products INSIDER Digital Magazines deliver feature-style analysis, columns, and in-depth stories in an always on, always accessible format. Since each issue is thematic, our audience, your customers, finds exactly what they need exactly when they need it to help them along their specific decision-making process.

January	February	March
<p>Copacking for Foods Food and beverage brands want to choose copacking partners that help them bring quality, safe and transparent products to the market. Providing selection tips, examining the supply chain and discussing ingredient premixes. Sales Reservation: January 2</p> <p>CBD Cannabidiol (CBD) is gaining traction in foods and supplement products that address brain, mood and skin health. Exploring CBD science, regulations and trending product types. Sales Reservation: January 17</p>	<p>Botanicals Botanicals have been used in foods and supplements to address health conditions for centuries, but innovation still abounds ingredients such as green tea, curcumin, ginger, fenugreek, saw palmetto, cinnamon, boswellia, ginkgo, maca and rhodiola. Helping brands address supply chain concerns, market data, and food and beverage formulation. Sales Reservation: January 29</p>	<p>Digestive Health To consumers, digestive health has expanded beyond reducing tummy troubles, as microbiome research connects the gut to other body systems. Discovering the latest ingredient research, formulation of these ingredients into foods and supplements, and notable digestive health products. Sales Reservation: February 22</p> <p>Personalized Energy and Sports Performance Athletic needs are specific and based on body type, sport and exertion, so athletes want foods and supplements that treat them like individuals. Looking at nutrient timing, sport-specific needs and mitochondrial ingredients, such as CoQ10, PQQ, ALA, carnitine and omega-3s. Sales Reservation: March 18</p>
April	May	June
<p>Contract Manufacturing for Supplements Most own-label supplement distributors use contract manufacturers to source ingredients, craft products and manufacture success. Exploring the contract manufacturer selection process, supplement delivery systems and supply chain considerations. Sales Reservation: March 25</p>	<p>Sports Nutrition: Muscle Building Athletes and active consumers look to nutrition to help support the muscle gains they make with exercise. Reviewing blood flow boosters, formulation and flavor challenges, and novel ingredient developments. Sales Reservation: April 17</p> <p>Beverages Bottoms up! Consumers enjoy getting nutrients from drinks that quench their thirst as long as the product is healthy for them and the environment. Covering different beverage types, ingredients and market data. Sales Reservation: May 16</p>	<p>Healthy Aging With Boomers getting older and younger consumers focused on longevity, the market for healthy aging products is ripe for innovation. Addressing cognitive health, ingredients that support activity and wellness, and bone health. Sales Reservation: May 31</p>
July	August	September
<p>Women's Health for Every Life Stage A woman's nutritional needs changes as she passes through different decades, but women always demand safe, efficacious and mindful products. Discovering the latest ingredient research for maternity, fertility and menopause health, and product formulation trends. Sales Reservation: June 17</p> <p>Contract Labs Health and nutrition products often don't have the equipment or expertise to test their ingredients and finished products, but the regulatory requirements of verification still stand. Looking at choosing a third-party lab, auditing that lab and the latest testing technologies. Sales Reservation: July 17</p>	<p>Joint Health The pain-free movements allowed by healthy joints are a cornerstone of a quality life for aging consumers, and many active people are realizing the benefits of proper joint care. Examining recent joint health ingredient research, especially for sports nutrition; notable products; and formulation considerations. Sales Reservation: July 26</p>	<p>Packaging Packaging must do a lot for natural products. They must attract the eye, communicate marketing messages, fit legal requirements and meet consumer desires for sustainability. Examining sustainable solutions, technological innovations and third-party certifications. Sales Reservation: September 3</p> <p>Natural Colors & Flavors Artificial just won't do any longer in foods, beverages and supplements, so formulators must look to natural sources to color and flavor products that are attractive to consumers. Reviewing functional colors, flavors with sensory appeal and trending product categories. Sales Reservation: September 17</p>
October	November	December
<p>Probiotics These beneficial bacteria are increasingly becoming important in consumers' lives due to the new research, formulation advancements and expanding product categories. Exploring the latest science, formulating foods with probiotics, supply chain and safety. Sales Reservation: September 25</p>	<p>Plant-Based Revolution The demand to reduce animal product consumption is driven by sustainability, health and animal wellness concerns. Discover technologies in vegan supplement development, alternatives to meats in food products and the market needs for plant-based products. Sales Reservation: October 22</p> <p>Sports Nutrition: Female Athlete Strong and fit women are looking for nutrition products that address their needs to stay on top of the game. Looking at advancements in ingredient research for muscle building, endurance and body composition, and product formulation trends. Sales Reservation: November 14</p>	<p>Prebiotics Prebiotic fibers help feed beneficial probiotics, helping to ensure all health benefits are realized, but formulating with fiber and bacteria can be tricky. Examining the latest research on prebiotic health benefits, product formulation tips and synbiotic products. Sales Reservation: November 27</p>
